

Supply List

Below is a list of supplies that students will need for Algebra 1, Algebra 2, and Pre-Calculus with Mr. Lake:

1. Laptop or Chromebook Students may check out Chromebooks from the high school library or use their own. It is very important to have this device each day.
2. 1.5 inch 3 ring binder with pockets OR a notebook and folder Students will need this for taking notes and for working on assignments. Many students prefer a binder over a notebook because it is easier to add or remove papers.
3. Pencils/Pens Students will still want to be able to work out math problems on paper even though many assignments will be submitted electronically.
4. TI84 Plus Graphing Calculator This is required for Algebra 2 and Pre-Calculus. Graphing calculators will not be used in Algebra 1. Students may use their own or check one out from the high school library.
5. Textbook This needs to be checked out from the high school library.

Note, Algebra 1 students may need to use a scientific calculator from time to time. To access a calculator go to www.desmos.com. At the top of the home page click the down arrow next to math tools. Select scientific calculator in the drop down list.
